## MD. ABU KAUSAR

@ abukausar33@gmail.com♥ Dhaka, Bangladesh♥

m (+88) 01920455692 https://github.com/abu-kausar

## **CAREER OBJECTIVES**

I want to grow myself as a Software Developer from Dhaka, Bangladesh who love Programming, Developing and Passionate about learning new technologies. I'm a fast learner and can quickly integrate into team.

## **WORK EXPERIENCE**

#### Software Engineer

#### **Vemate**

December 2021 - Present

- Worked with Blockchain team to generate smart contract for Binance (BSC) based Crypto token named Vemate (VMT).
- Developed own staking system for Vemate having three different pools.
- Working with generating smart contracts for making Binance based fractionalized non-fungible token(NFT) marketplace.

#### **PROJECTS**

#### Operation Post Portal

Complete doctor's portal where only authorized user can take appointment and can pay the fee using stripe. On the otherhand, admin can add, manage admins.

• Frontend: React, Tailwind CSS

Backend: ExpressJS, NodeJS

Database: MongoDBAuthentication: Firebase

#### % Car Doctor

This is basically car service providing web app. Seems like user will order one/multiple services after authentication and authorization. User will have to authenticate through Firebase and authorize himself through JWT token here.

• Frontend: React, Tailwind

• Backend: NodeJs, ExpressJs

• Database: MongoDB

• Authentication: Firebase

#### <sup>Q</sup> Vemate Token

This is basically a Binance based crypto token named Vemate(VMT) which is audited by Certik. Also generated smart contract for private sale with staking and vesting system separately.

• Language: Solidity

• Tools: Remix IDE

#### % Vemate Staking Pool

This is basically a system of staking tokens having three different pools with auto reward (for mature staking) and penalty (for immature staking) system.

Language: SolidityTools: Remix IDE

## **TECHNICAL SKILLS**

- Languages: Javascript, Solidity, Python
- Web Technology: React, ExpressJS, NodeJS, Bootstrap, Tailwind, HTML5, CSS
- DBMS: MongoDB, Firebase
- Version Control Tool: Github, Git
- Tools: VSCode, Openzeppelin Defender, Remix, Truffle Ganache, Pycharm, Postman, Slack, Trello, Latex

#### SOFT SKILLS

Hard-working

Team Work

MS-Office

**Quick Learning** 

## **EDUCATION**

# BS in Computer Science and Engineering

#### **North South University**

**2016 - 2020** 

CGPA: 3.10

## Higher Secondary Certificate Shahid Syed Nazrul Islam College

**2012 - 2014** 

GPA: 5.00

## Secondary School Certificate Imambari High School

**2010 - 2012** 

GPA: 5.00

## **RESEARCH WORKS**

## Comparison of Facial Recognition Algorithms for Criminal Detection

Supervisor: Dr. Md. Mahfuzur Rahman

- Dataset: ORL, Yale
- Algorithms: FisherFaces, EigenFaces, LBPH
